

Seattle Tuberculosis Research Advancement Center

# TB Hack Day

**December 10th 2024, 9am to 3pm**

**Hybrid: Fred Hutch Steam Plant, O'Mack Suite and zoom**

**Goal:** Collaborating in small groups to develop new analytical insights from published bulk and single-cell RNA-seq datasets that profile NHP host gene expression during Mtb infection and BCG vaccination.

**Who:** Novice and experienced coders welcome!

**Program:** Short talks to introduce datasets, workshops on analysis techniques, and open-ended hack time to plan and execute analyses.

**Food: Breakfast 8:30am, lunch 11:30am, happy hour snacks 3pm.**
